

Denise Govindarajan, Associate Director of IT Application Development

IT Application Development provides technical expertise for PC(USA) by developing and maintaining business applications, databases and websites. Automated solutions are created in collaboration with our clients to solve complex business challenges.

Key tasks for the department:

1. Upgrade programming language to newest version for all Python applications.
2. Consolidate the OGA and PMA websites into the PC(USA) website.
3. Upgrade Raisers Edge and Financial Edge from self-hosted to cloud hosted NXT.
4. Support PC(USA) agencies by creating and enhancing websites, applications and databases.
5. Consolidate and upgrade application servers.
